

FieldGenius 2006

Keyboard Shortcuts

FieldGenius 2006 includes programmable shortcut keys for quickly starting a command, changing shot modes, or manipulating your project. While the MicroSurvey Tracker and Tracker Xtreme data collectors have these shortcuts printed on the keypad, you can also use them with any other data collector that has a keypad, such as the Ranger or Allegro. You can use the following default shortcut keys, or you can re-program them by going to **Settings | Keyboard Shortcuts**.

Default Shortcut Keys

Measure Point	Return	Traverse/Intersection	C
Sideshot (Auto Store)	I	Station/Offset	Y
Sideshot	J	Calculator	F
Temporary Observation	K	Automap Library	D
Distance Offset	E	Figure List	L
Horizontal Angle Offset	A	Toggle GPS Coordinates	G
Multi-Set	M	Store Points	W
Resection	R	Delete Last Saved Point	Disabled
Set Target Heights	T	Coordinate Database	P
Occupy Point	O	Add Comment	X
Check Backsight	N	Raw File Viewer	U
Check Point	Q	COGO History	V
Stake Points	S	Menu Home	H
Staking List	Z	EDM Mode: IR Fine	1
Inverse	B	EDM Mode: IR Rapid	2

Note: You can also assign six other EDM Mode shortcuts for whatever modes are supported on your instrument.
